Thomas Verry

Software Engineer

in https://www.linkedin.com/in/jake-verry/

SUMMARY

Versatile and motivated software engineer with a strong foundation in computer science, full-stack development, and cloud-based application design. Skilled in building mobile applications using Flutter and scalable backends using Firebase. Hands-on experience with REST APIs, agile development, and collaborative project delivery. Passionate about building intuitive, impactful software with clean, maintainable code.

WORK EXPERIENCE

Full-Stack Developer (Freelancer) | Verry, LLC

08/2024 - Present, Virginia Beach City, United States

- Built and deployed mobile applications using Flutter on both Android and iOS.
- Designed backend services using Firebase, including Firestore, Authentication, and Cloud Functions.
- Developed RESTful APIs for dynamic features like content feeds, user profiles, and real-time notifications.
- Collaborated with clients to define technical requirements and deliver scalable, maintainable solutions.

AI/ML Engineering Internship | WIGWAGAPP, INC

11/2023 - 08/2024, Newport News, United States

- Contributed to backend development efforts involving API design, LLM integration, and AI-driven features.
- Performed feature engineering on user interaction data to improve the performance of personalization and recommendation models.
- Supported the development of a Retrieval-Augmented Generation (RAG) system to deliver smarter, context-aware responses.

Software Engineer | Emissary Recruiting Solutions

04/2021 - 11/2023, Yorktown, United States

- Automated key steps of the recruitment pipeline using tools like Zapier, improving workflow efficiency and reducing manual tasks.
- Integrated marketing channels (e.g., email campaigns, social media platforms) with the company's CRM system, enabling real-time lead tracking and engagement.
- Developed internal tools and custom scripts to support candidate tracking, data syncing, and reporting.

EDUCATION

Bachelor's Degree - Computer Science & Business Administration | Christopher Newport University 09/2020 - 05/2024, Newport News, United States

Certification - Machine Learning | Google

03/2025 - Present, Virginia
